Brake Fluids

When did you last change your Brake fluid?

If you have never replaced your brake fluid, we strongly recommend you inspect all seals and hoses and replace as necessary.

Unipart Brake/Clutch Fluid.

Most modern day cars use DOT 4 clutch and brake hydraulic fluid - which is the minimum specification.

Unipart DOT4 Brake/Clutch Fluid;

(01)	500ml	GBF4102
	1 litre	GBF4103
	5 litre	GBF4104

Silicone Brake/Clutch Fluid DOT5 ABF.

This high performance fluid is non-hygroscopic, so it doesn't promote rust problems in the hydraulic system and won't damage your paint work. When silicone is in use it will provide years of trouble free braking.

Silicone Brake/Clutch Fluid;

(02)	500ml	ABF3
	1 litre	ABF4

Racing Brake/Clutch Fluid DOT5 ABF.

Racing fluid DOT 5 GBF5 really is the ultimate in brake fluid. Its anti-boil properties mean that even when the brakes get hot the fluid will remain efficient, rather than boiling locally into useless vapour - such as in the calipers.

Due to its high hygroscopic nature, Racing fluid should be replaced annually otherwise the integrity and effectiveness will be drastically reduced.

	500ml	GBF5102
	1 litre	GBF5103

Brake System Tools

When bleeding the brakes on any car it is very important to have the correct tools. We supply some very useful items as an alternative to a piece of rubber hose and a pair of pliers.

Eezibleed Kit.

Eezibleed is an excellent way to take away the fuss and mess from bleeding hydraulic systems. Fed by air pressure from the spare wheel, it provides 1/4lb of pressure to the fluid container.

(03)	Eezibleed Kit	MRD1001
------	---------------	---------

Visibleed One Man Bleed Tool.

This one man bleed tool is a must. Using a one way valve, the fluid is allowed through the valve but the air is prevented from returning back into the system.

(04)	Visibleed One Man Bleed Tool	GAC9378X
------	------------------------------	----------

Mityvac Hydraulic Systems Tool.

This popular (and proven) system is perfect for bleeding hydraulic systems. Our kit includes: vacuum/pressure pump, vacuum gauge, 1/4" tubing, automotive and brake bleeding adaptor packages, reservoir jar and manual. Detailed instructions include ideas for additional uses.

	Mityvac Kit	386-215

Brake Hose Clamp.

The brake hose clamp is chrome plated and has a knurled securing nut. Note; these clamps should not be used on stainless steel braided hoses.

Cooling System

Preserve and Maintain your Cooling System.

Water is a most efficient liquid for cooling engines, but it has two distinctive drawbacks. Firstly it freezes in winter, and secondly it does nothing to stop corrosion.

Classic cars can feature large amounts of aluminium, copper, brass and bronze, so it is imperative that a corrosion inhibitor be used to protect the engine's cooling system. There are four types of corrosion;

- DEPOSITS;** Calcium carbonates that form hard deposits and adhere to radiator tubes etc...
- OXIDATION;** The combining of oxygen and iron to form rust.
- ELECTROLYSIS;** A chemical reaction between dissimilar metals which react with one another via water thus conducting electricity and deposits on the negative (cathode to anode) area.
- EROSION;** A mechanical problem caused by water turbulence and flow.

Redline Water Wetter.

Another magic potion from the USA, this additive for the cooling system improves efficiency in three ways.

Firstly, it improves the specific heat capacity of water, the amount of energy required to raise temperature meaning the water in the system takes more heat away from the metal parts of the engine. When the water reaches the radiator it is able to transfer more heat energy to the metal radiator core and then to the cooler air flowing through it.

Secondly, it reduces the surface tension of water allowing it to flow more freely through the system and make better contact with the metal parts, i.e. engine and radiator.

Finally, it has a lubricant quality which prolongs the life of the water pump main seal.

(06)	Redline Water Wetter	MM220-115
------	----------------------	-----------

Anti-Freeze And Summer Coolant.

It's not just during the winter that you need protection for your engine and radiator. The inclusion of a glycol based Anti Freeze not only stops the water from freezing during the winter, it also acts as an extra coolant during the summer by removing heat more efficiently from the block and dispersing it even in the worst traffic jam. It also helps to protect from corrosion.
